

## WOOD GUN E155 OUTDOOR VERSION

**20 year  
warranty**  
on Wood Gun

Wood Gun E155 OBE now available!

The E155 OBE (Outdoor Boiler Edition) is built for placement outside the home. Outdoor boilers offer the advantage of keeping wood ash, dirt, smoke and wood insects away from the inside of your house. The E155 OBE features the same attributes as the E155 SS/CS models, with the addition of the exterior insulated cabinet.

The E155 OBE offers advantages not seen in European designs:

- No thermal storage required! (SS vessel only, can still be used *with* thermal storage)

- Thrives on full rounds of up to 10 inches diameter!
  - Efficient performance on wood up to 30% moisture.
  - Stainless steel vessel (carbon steel option available - requires thermal storage) for unsurpassed durability.
- The family features that characterize the Wood Gun, its robust construction and design, are clearly displayed in the E155 OBE.
